Two-factor methods

Authenticator app (Configured)

Edit

Authenticator apps and browser extensions like 1Password, Authy, Microsoft Authenticator, etc. generate one-time passwords that are used as a second factor to verify your identity when prompted during sign-in.

Scan the QR code

Use an authenticator app or browser extension to scan. Learn more about enabling 2FA.

Unable to scan? You can use the setup key to manually configure your authenticator app.

Verify the code from the app
